

DATA SHEET - Agrimin 24.7 Copper boluses for Cattle

Presentation

A 25g bolus containing the following trace elements:

Composition

Each bolus contains 25g of copper oxide rods, equivalent to 21.25g of copper

Uses

A sustained release bolus containing copper, intended for growing cattle and breeding cows on grass or forage based diets.

Agrimin 24.7 Copper is designed for situations where soil and forage copper levels are low or where known copper antagonists such as molybdenum, iron and sulphur are high.

Agrimin 24.7 Copper supplies the animal's daily requirement of copper over a period of 180 days.

Dosage and Administration

Administer orally. Place the bolus at the back of the mouth using a suitable applicator:

Cattle under 250kg - One bolus

Cattle over 250kg - One or two boluses

Contra-indications, warnings etc

Do not administer to pre-ruminant animals or to calves under 100kg. No other form of copper supplementation should be given immediately prior to or 6 months after administration of the boluses. Do not exceed the recommended supplementation levels. Care should be taken when bolusing animals to avoid causing injury to the mouth and pharynx.

Pharmaceutical precautions

Store in a cool, dry place

Reseal part used packs

Do not drop onto hard surfaces

Keep out of the reach of children

Legal Category

Dietetic complementary feed

Package Quantities

Agrimin 24.7 Copper boluses for cattle are available in packs of 24 boluses
