

DATA SHEET - Agrimin 24·7 Copper boluses for Sheep and Lambs

Presentation

Hard gelatin capsules containing copper oxide.

Composition

Each sheep copper bolus contains 4.4g of copper (4g copper oxide) and each lamb bolus contains 1.7g of copper (2g copper oxide)

Uses

Agrimin 24·7 Copper are long acting capsules for the oral administration of copper to sheep and ruminating lambs. They are designed to maintain normal copper levels over the whole grazing season (approx. 6 months).

Dosage and Administration

Place the capsule at the back of the mouth using the suitable applicator

- Adult sheep over 40kg-One 4g capsule
- Ruminating lambs over 20kg-One 2g capsule
- Both Sheep and Lamb Copper are available in packs of 250

Contra-indications, warnings etc

Do not administer to pre-ruminant animals. No other form of copper supplementation should be given immediately prior to or 6 months after administration of the capsules. Do not exceed the recommended supplementation levels. Caution is advised before supplementing housed sheep and those breeds known to be susceptible to copper toxicity (e.g. North Ronaldsay and Texel)

Pharmaceutical precautions

Store in a cool, dry place
Reseal part used packs
Do not drop onto hard surfaces
Keep out of the reach of children

Legal Category

Dietetic complementary feed

Package Quantities

Agrimin 24·7 Copper boluses for sheep are available in packs of 250 capsules.
