

Rumbul Magnesium Bullets For Cattle and Sheep

Bolus Technology

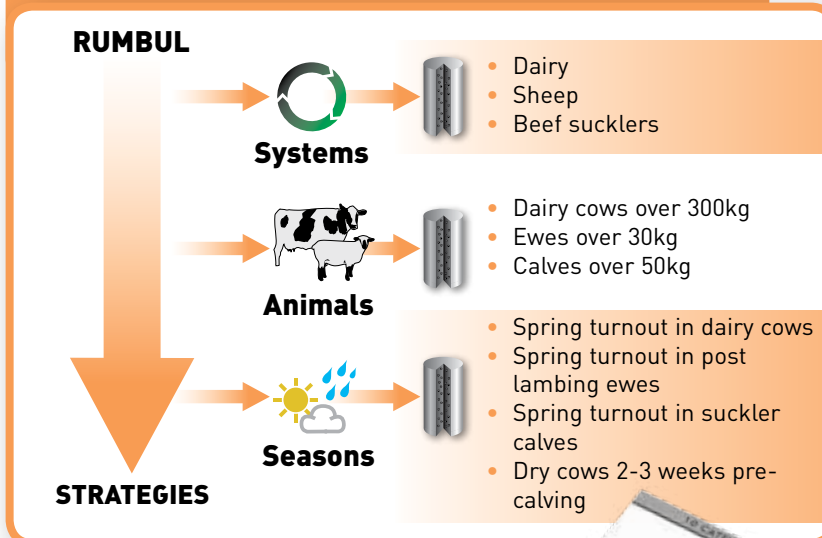

Soluble magnesium alloy dissolves by electrolysis in the acid environment of the reticulum

Dispersed iron shot particles maintain density of the product ensuring it remains in the reticulum

No residues left after active life

Product	Active Life	Administration
Rumbul Magnesium Cattle	28 days	2 Bullets
Rumbul Magnesium Sheep	21 days	1 Bullet
Rumbul Magnesium Calf	21 days	2 Bullets

Managing the magnesium status of the herd or flock over high risk periods

Benefits

- POM-VPS licensed as an aid to the prevention of hypomagnesaemia in cattle, sheep and calves
- Certain supply of magnesium during high risk period
- Use pre calving to help boost magnesium intake
- **Pack size - cattle - 10 bullets**
- **Pack size - sheep/calves - 20 bullets**
